DETAILED ACTION

Terminal Disclaimer

The terminal disclaimer filed on October 28, 2003 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of any patent granted on application number 09/971,116 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

Claims 1-7, 9-11, 13-39, and 41-47 are allowed.

The following is an examiner's statement of reasons for allowance: As the claimed invention was read in light of the specification, the prior art of record fails to disclose or render obvious a mass spectrometer adapted for underwater use comprising a watertight case having a fluid sample inlet, a fluid control system adapted to acquire a fluid sample from an aqueous environment for delivery into the watertight case, the fluid control system positioned within the watertight case and in fluid communication with the sample inlet, means for transforming an analyte molecule in the fluid sample from a liquid phase into a gas phase positioned within the watertight case, means for directing the fluid sample to the transforming means from the acquiring means, a mass analyzer housing positioned within the watertight case, the mass analyzer housing in fluid communication with the transforming means, a quadrupole mass filter positioned within the mass analyzer housing, and a vacuum pump system adapted to establish a vacuum within the mass analyzer housing, the vacuum pump system positioned within the watertight case and in fluid communication with the mass analyzer housing.

The closest prior art, Zhu (5,192,865), Slivon et al. (4,982,097), and Fischer et al. (5,703,360), teach a means for transforming a solution into ions and directing the fluid to a transferring means. They also teach quadrupole mass filters and ion trap mass spectrometers, but they do not teach or render obvious acquiring a fluid sample from an aqueous environment or the use of a fluid control system in fluid communication with the sample inlet.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
